

AMPCO PE PUMP

THE PREMIUM ECONOMY PUMP

Remanufactured to NEW pump standards
Highest quality, stocked for immediate shipment, cost efficient
ONE YEAR FULL FACTORY WARRANTY

Ampco *PE* Pumps are remanufactured with new parts, machined to new pump standards and each pump is fully tested before shipping.

Ampco *PE* Pumps are identical to new pumps; cosmetically and functionally. The body, cover and gear case are machined and polished back to new specifications, and all other components are replaced with new parts.

Ampco *PE* pumps cost 25% less than a comparable new pump. By reusing the body, cover and gear case, material costs are greatly reduced.

The Ampco *PE* Pump program is unique because we have the pumps fully machined, assembled and ready for immediate delivery. This program was designed to offer quality, convenience and value pricing. It will also benefit customers that need an immediate solution and can't wait for a new pump to ship.

FEATURES OF THE AMPCO *PE* PUMP

- 17-4 PH-1150 Shafts - Provides twice the tensile strength of 316
- Stainless Steel Bearing Retainers - Prevents corrosion and enhances bearing protection
- Helical Gears - Increased load carrying capacity and reduced noise
- Powdercoat paint - Better protection in a caustic environment and chip resistant
- Sealed Cleanout Plugs - protect and extend bearing life from water penetration

PE Pump Remanufacturing Process

All parts are replaced with NEW parts

We completely tear down the pump. All internal components; shafts, bearings, gears, spacers, seals, etc. are removed and replaced with new components.

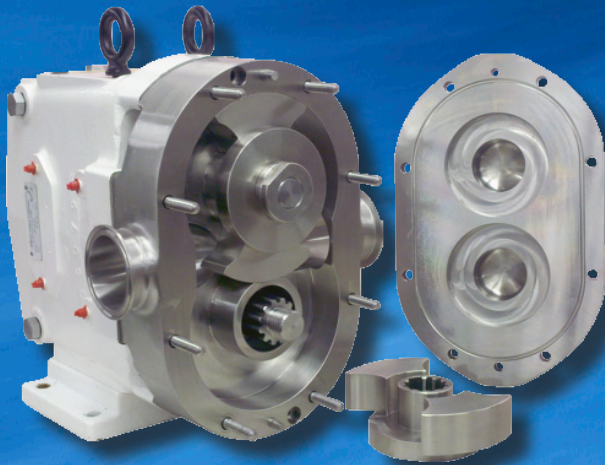

We machine body and cover to standard oversized dimensions; +.020, .040, .060, .080.

Body and Cover are polished back to their original 32 RA finish.

We machine new oversized rotors to bring back tolerances to match new pump performance/efficiency.

Pumps are assembled to the same factory specified tolerances of a new pump. Pumps are assembled less seals/elastomers until Customer specifies option.

Pumps are 100% water-tested before shipment to assure flow requirements are met, as well as seal leakage. All pumps are sold with a one year full factory warranty - the same warranty as a new Ampco pump.

PE Pumps are in stock and ready for immediate delivery Visit our website for current inventory

If you need to modify any of the pumps in inventory send us an inquiry and we'll quote the best possible lead time and price. We can change the connections; shaft position or even a special clearance rotor. Pumps with a single-o-ring or single mechanical seal are shipped in two business days.
