MOTOR INFORMATION

WST Series pumps are equipped with 56 Frame, U.L. Recognized explosion proof motors as standard. These motors have cast iron end bell at pump end, and oversized ball/ball bearing construction. Rated for continuous duty at all ratings shown. Both single and three phase motors must be installed with a magnetic starter which provides full-leg overload protection. Failure to use the correct starter and overload protectors will void the warranty. All motors are supplied by companies having national service facilities.
