

# 8304B-HM5C / 8304BV-HM5C Hydraulic Driven Gear Pump

This positive-displacement pump is ideal for de-icing (pre-wet). Combining the pump and motor as a single unit eliminates the need for shaft alignment or Love-Joy® coupling. The unit's compact size allows it to be used in a wide variety of locations and makes it especially attractive for quick, easy retrofit installations.

### PUMP FEATURES & BENEFITS:

- Optional pressure relief valve .....Safeguards against pressure buildup
- Industry-proven gear pump design .....Minimal moving parts for longevity

### MOTOR FEATURES & BENEFITS:

- State-of-the-art internal gear gerotor motor ..Maximum service for any application
- Bypass adjustment .....Allows fine tuning of flow control
- ½" NPT ports with anti-reverse check .....Safeguards against change in flow direction

This data was generated using water as the pumping media. Performance will vary with different viscosity fluids. Hydraulic pressures vary from 200 to 850 PSI for the performance chart above.
