## Parts Update – Deluxe Flush (Pre-2010) Major Service Kit 58100-1000 and Hose Kit 58102-1000 Now Obsolete

This bulletin is in regards to the **discontinuation** of our Major Service Kit (Part# 58100-1000) and hose kit (part# 58102-1000) for our Deluxe Flush series toilets manufactured before 2010.

The post-2010 and pre-2010 Deluxe Flush toilets had different shaped, specialty formed hoses for the two designs. The hoses used on our Pre-2010 Deluxe Flush toilets are no longer manufactured. If you have a Pre-2010 Deluxe Flush toilet and need to change the hoses, you will need to purchase a new Pump Assembly (Part# 58103-1012 (12V) or 58103-1024 (24V), which will include the current style pump assembly as well as the current style hoses.

In addition to different shaped hoses, there is a difference in the non-return valve assembly that will help you determine whether you have a pre or post-2010 Deluxe Flush toilet. A Pre-2010 features a straight non-return valve assembly instead of the rotatable elbow on the Post-2010 versions.
