

# JABSCO®

**ELECTRIC WATER SYSTEM PUMPS**

**Models: 36800-0200 12 V**  
**36800-0210 24 V**  
**36900-0200 12 V**  
**36900-0210 24 V**  
**36950-2200 12 V**  
**36950-2210 24 V**

## **DATA INSERT- LOW PRESSURE MODELS**

### APPLICATION

The low pressure models are intended for use where the standard model exceeds the pressure requirements of a particular system. This may be when an instantaneous water heater is used in the system or other system components which may not tolerate higher pressures.

A drop in flow, under restricted flow conditions with some increase in pump cycling, may be noted.

An accumulator tank such as the Jabsco 12573-2000, 30573-0000, or 18810-0000 can be beneficial in a restrictive plumbing system.

### SPECIFICATION

**Cut-in Pressure: 10 psi Nominal (69kPa)**  
**Cut-out Pressure: 20 psi Nominal (138kPa)**

**NOTE: Cut-out pressure will vary slightly (+4 psi) between models and, to a lesser degree, between plumbing systems.**

**Other specifications remain essentially the same as the standard higher pressure model.**

### REPLACEMENT SWITCH

**The only difference between the standard model and the low pressure model is the pressure switch (Key 13).**

**FOR LOW PRESSURE MODELS  
ORDER SWITCH NUMBER:  
44814-1000**
