

WGP-65-PW

Features

- Unique dual discharge allows for operation of two water features simultaneously
- Powerful direct drive pump produces greater starting torque and flow pressure than comparable magnetic drive submersible pumps
- Designed to operate continuously
- Corrosion resistant body
- Environmentally safe, oil-less
- 16' power cord
- 20' maximum lift
- 230 watts
- Includes two 1-1/4" MNPT × 1" barbed elbow adaptors and a 1-1/4" MNPT discharge cap

Construction

- Discharge — 1-1/4" FNPT
- Housing — Polypro
- Cover — Polypro
- Volute — Polypro
- Impeller — Noryl
- Shaft Seal — Nitrile

This pump utilizes a permanent-split capacitor (PSC) motor sealed in a stainless steel housing, which in turn is surrounded by a plastic case. The PSC motor allows the pump to use less energy than other pumps of similar flow capacity. The motor also develops less heat; therefore, the pump does not require oil internally. This pump is ideal for use in waterfall and stream applications found in water gardens.
