TE-5A-MD

TE-5S-MD

AC-5C-MD

AC-5A-MD

DESCRIPTION: Series 5 are centrifugal magnetic drive pumps, eliminating the need for a shaft seal. These pumps can be serviced with a screwdriver. See the repair parts list for a breakdown of replacement parts.

OPERATION: These pumps are not self-priming, lack a suction lift, and thus require a flooded suction. These pumps **cannot be run dry** because the impeller requires the liquid being pumped for lubrication. For liquids with a specific gravity greater than water, have a higher viscosity, or for elevated temperatures, a trimmed impeller may be necessary. For application assistance, contact March Pump.

ELECTRICAL: AC-5-MD pumps are 115V or 230V, 1 phase, air cooled. TE-5-MD pumps are 115/230V, 1 phase, TEFC. The motors are U.L. listed and rated as continuous duty. Explosion proof and special voltage motors are available on the TE-5-MD upon special order.

NOTES: All specifications & data are based on pumping water & are intended as a guideline only. Specifications may vary with different motors.
