Advantages:

- Constant control of pressure, current and voltage.
- The motor gradually runs to reach the required flow rate.
- There is no need of an accumulator tank.
- The electronic system tries to re-start the motor 4 times.
- Pump functions monitored by a LED.
- Proportional reduction of noise, current absorption and mechanical wearing
- The pump is protected against short circuits and overloads.
- There is no need of fuse.
- Blue flashing LED indicating empty tank.
