HAVING TROUBLE IDENTIFYING AN IMPELLER?

Depco can make impeller identification a painless experience. Within this catalog (on pages 149-156) are easy to use impeller silhouette charts for pumps manufactured by Jabsco, Oberdorfer, Sherwood and Johnson. These charts provide a silhouette of each impeller size allowing you to easily compare what's left of your old impeller to our diagram. Each chart also identifies the drive type (key, spline, pin, etc.) diameter, width and part number of each impeller. We also have engine brand specific impeller cross reference charts (see below). If you're still lost after using our charts don't dismay... just call Depco and we'll identify your impeller over the phone. Simply have the remains of your impeller, a ruler and whatever information you have on your pump and engine with you when you call. We're not stumped very often and love the challenge.

Volvo Impeller Cross-Reference	
Volvo Part #	Depco Part #
801277	JS 10288 / JA 920-0001

ENGINE BRAND IMPELLER CROSS REFERENCES

Years of effort in identifying proprietary engine cooling pumps, parts and replacement impellers have resulted in volumes of reference material in our marine department. Some of this wealth of information on impellers has been reproduced in this catalog. Impeller reference lists can be found for Volvo (this page), Cummins (page 99), Caterpillar (page 102), Chris-Craft (page 125), Crusader (page 122), Detroit Diesel (page 96), Grey (page 121), Hino (page 119), Kohler (page 104), Mercruiser (page 119), Onan (page 110), Perkins (page 110), Pleasurecraft (page 120), Universal (page 113), Westerbeke (page 106) and Yamaha (page 128). If you don't find a cross reference for your impeller give us a call. We'll utilize our experience, search our vast library, or call on our industry contact to match out and identify the source for your impeller.

ENGINE BRAND INDEX

Aifo Iveco	126
Alaska Diesel	103
BMW	102

NEED AN ODDBALL OR DISCONTINUED PUMP REBUILT?

Here are just a few of the unusual pumps we've brought back to life. From old gear pumps from the 40's to experimental pumps off high performance engines, Depco has the expertise, parts and machine shop and the patience to get you back on the water!
