Reverse Osmosis	72
Strainers.....	65-68
Washdown.....	76-78, 94, 21-28
Water Systems.....	73, 11-20

PUMPS PAINTED TO MATCH YOUR ENGINE ROOM

One of the many services Depco provides is painting. We'll paint your bilge, water system, oil change, fuel transfer, fire, air conditioning and/or any other pump to match your engine room. Where else could you get service like this?

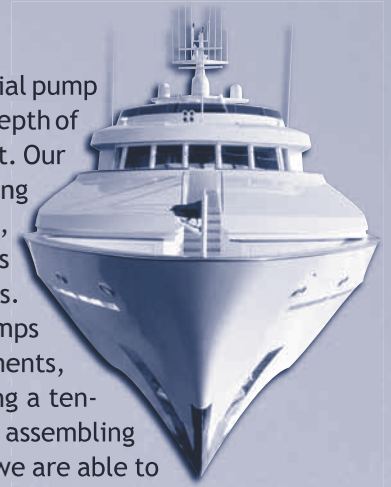

ABS COMPLIANT STRAINERS

ABS (American Bureau of Shipping) requires unique strainers to meet their standard. Simply put, the strainer body, bowl and porting must be completely constructed of metal (clear plastic bowls for strainer basket viewing are not permitted). These requirements provide added protection against catastrophic strainer failure. Groco offers ABS compliant strainers in several of their series. Call us with your requirements.

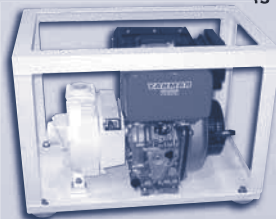

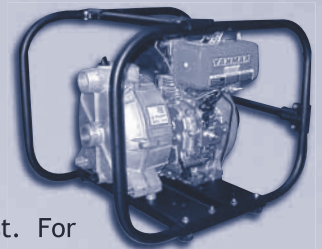

DEPTH OF EXPERIENCE, WEALTH OF PRODUCTS

Twenty years of service to the marine and industrial pump industry has given Depco Pump an un-paralleled depth of familiarity with every fluid handling system afloat. Our global experience on luxury yachts has us working hand in hand with architects, engineers, builders, suppliers, re-fit facilities and captains, conscious of the needs and concerns of all interested parties. Our wealth of products enables us to furnish pumps that meet or exceed your most stringent requirements, whether MCA, Lloyds, ABS, USCG or simply fitting a ten-pound pump in a five-pound hold. By custom assembling your specified pump end to the required driver, we are able to support any system be it single or three phase, 50 or 60 hertz, AC or DC power, hydraulic, pneumatic, diesel, gas, clutch, gear, pulley or manually operated.

DIESEL POWERED FIRE PUMPS!

Standby diesel driven fire fighting pumps are now required on many vessels by the US Coast Guard. The Cadillac of them all is the bronze HHLF pump with a 10 HP Yanmar diesel engine. This pump

is also available in cast iron construction at a lower cost. For those looking for the best priced unit, AMT manufactures an aluminum pump mounted to Yanmar 4.7 HP diesel engine. All models provide ample flow and pressure to pass US Coast Guard requirements for L & S crafts. See page 71.

DON'T SEE WHAT YOU WANT IN OUR CATALOG? CALL US. WE'LL CREATE IT FOR YOU!

On a daily basis we design, build, and ship custom solutions to unique requirements from across the globe! Need 50 hz, 3 phase or a large DC pump? We stock the components to quickly deliver. Want a diesel stand- by fire pump that meets USCG requirements?

Do you want it in a cage? We've had so many requests that we've made it a stock item! Whatever you might need... if it's a pump, Depco is your source!
