SEALAND MACERATOR AND VACUFLUSH PUMPS

Sealand originally developed the rugged "T" series line of bellows sewage discharge pumps for their own toilet systems. However, it was so successful they have made it available for all sewage discharge applications. These pumps will move up to 200 gph, handle 1/2" diameter solids, and accept 1 1/2" slip-on hose (1 1/2" x 1" hose adaptor is included). The "S" series vacuum pumps are specifically for use on Sealand's "Vacuflush" toilet systems. They are designed for single toilet installations, draw 6 amps and can run dry.
