DEPCO STOCKS UP TO 4" STRAINERS!

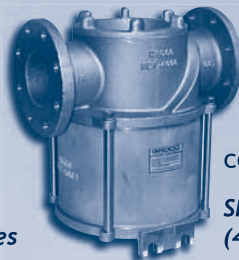

Groco ARG Series

Depco is more than just pumps! We have been steadily increasing our inventory over the years of strainers and their respective service parts to include models from 1/2" threaded to 4" flanged or threaded ports. Groco's ARG and SA series (available in 1/2" to 3" threaded ports strainers) along with Perko's 493 series (available in port sizes from 1/2" to 2 1/2" threaded ports) are heavy duty bronze raw water strainers used throughout the marine industry to protect engine cooling and air conditioning/refrigeration pumps. Groco's SE series are specifically designed for high power marine engines with 4" or larger raw water intakes which require high flow rates and low restriction. The SE series is available in 4" threaded or 4" to 6" flanged ports. A metal enclosure is also available on all three SE sizes to meet ABS requirements.

Perko 493 Series

SE Series (4" ASEF with ABS enclosure)

Depco also stocks a wide variety of economical plastic strainers for raw water, fresh water or bilge suction applications. See pages 67-72 for our complete selection.

YES, WE STOCK THRU-HULLS AND SEACOCKS!

Yes, Depco is now stocking a representative inventory of seacocks and thru-hulls manufactured by Rule, Groco and Perko. Pumps will always be our specialty. But when we were asked to carry these items we delivered! See page 65.

DEPCO IS YOUR BLOWER SOURCE

Depco offers a complete range of marine blowers starting with Rule's extremely economical and compact inline series which deliver 235 cfm up to Gianneschi's heavy duty metal framed blowers which deliver from 100 to 6,000 CFM's. Jabsco's plastic blowers range from economical inline to flex and flange mount side discharge models with flows to 250cfm in 12vdc, 24 vdc, 32 vdc and 115 vac voltages. Depco maintain a good inventory of hard to find 32 vdc blowers, pump and motors. 115 vac blowers are also available to run on shore or generator AC power saving your valuable batteries. See page 64.

360° "SOS" DISTRESS SIGNAL PROGRAMMED INTO THESE NEW SEARCHLIGHTS!

Jabsco's new series of electronically controlled searchlights includes an automatic 20° sweep feature with two speed movement – fast for searching, slow for pinpoint targeting, plus an emergency feature that will automatically transmit the "SOS" distress signal through 360°. These searchlights are available in chrome or Jabsco's new sleek sweeping curve design with white finish. See page 63 for additional information.
