### HOW TO USE THE DEPCO CATALOG

This catalog provides a quick reference for viewing the wide variety of pump types, sizes and construction materials available. The curves, charts and specific pump data displayed are provided to assist you in narrowing your search for the best pump to fulfill your application. This catalog **does not** provide all the information required to make your final pump selection. We are here to promptly lead you through the selection process with additional pump specifications, liquid compatibility information and our years of application and systems experience. Call, fax or e-mail Depco and we will make pump selection a simple and pleasant experience!

All curves and charts in this catalog have been developed at sea level with water at 70° F unless otherwise noted.
