

CAST IRON / BRONZE / 316SS GEAR

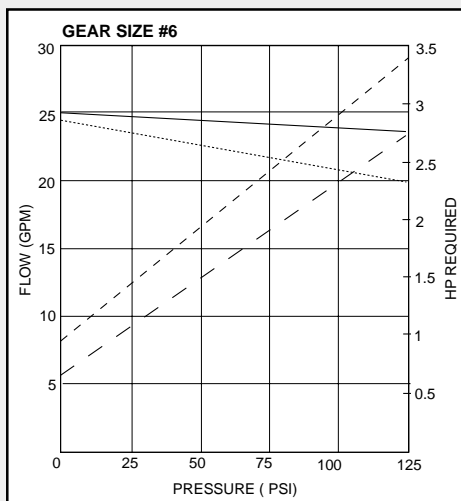

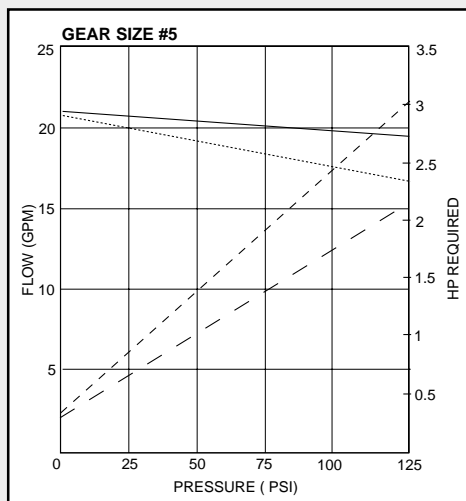

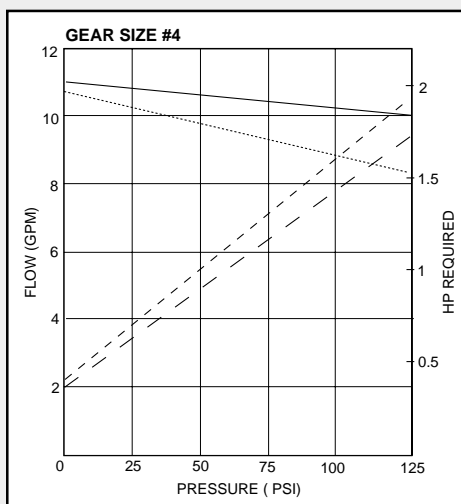

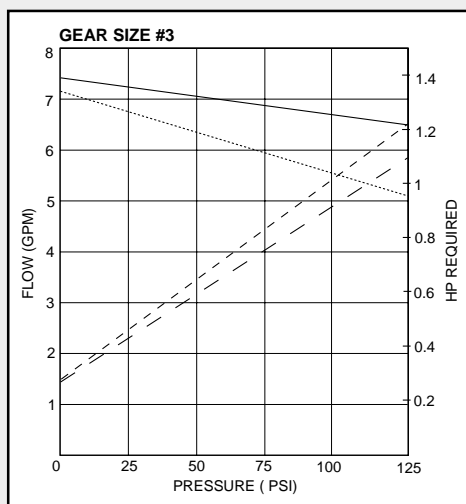

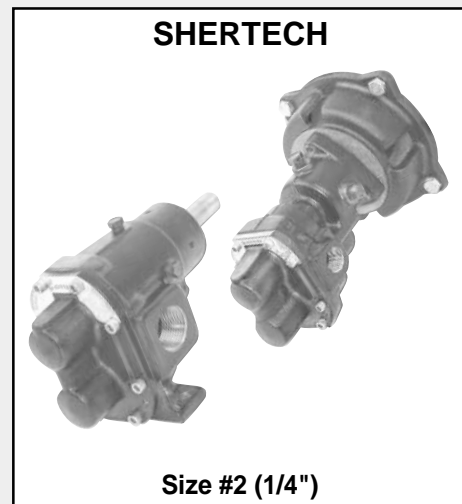

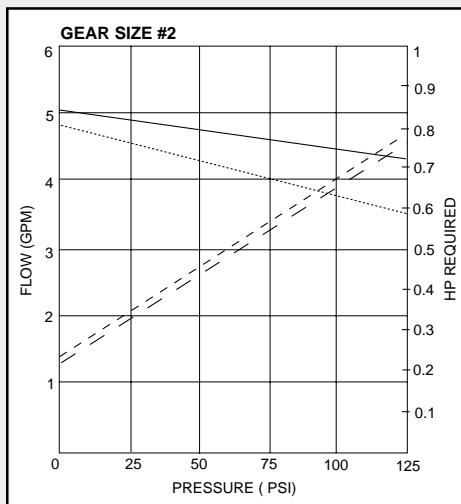

The Shertech pump series offers a wide range of flows, materials of construction, and mounts (pedestal or C-face) to accommodate the majority of gear pump applications. Each pump is equipped with a mechanical seal of Buna, Viton or Teflon and can handle pressures of up to 200 psi. Other standard features include an outboard ball bearing, flush port, and quiet PPS gears on the bronze and stainless series. The cast iron (top picture), bronze (middle picture), and stainless series (bottom picture) are available in all flow sizes.

UP TO 24 GPM, 200 PSI

- Materials of Construction: Cast Iron, Bronze, 316SS
- Mechanical Seal Options: Buna, Viton and Teflon
- Mounting Options: Pedestal, 56C, 145TC, 182TC and 184TC

CURVE LINE KEY:

- Flow vs. Pressure (oil 500 ssu)
- Flow vs. Pressure (water)
- - - - - HP vs. Pressure (oil 500 ssu)
- - - - - HP vs. Pressure (water)
