

CUSTOM ASSEMBLIES TO FIT YOUR NEEDS AND BUDGET!

BASE MOUNTS

CARTS

CLOSE-COUPLED

Depco's sales engineers will walk you through the pump selection process to ensure the most effective pumping principle (see pages 2 & 3) is used, the best drive (inverter, SCR, belt, air, hydraulic, electric, etc.) for your requirements is selected, the proper duty seal (flush, double mechanical, Tungsten Carbide, lip, o-ring, etc.) is installed, and keep the cost within your budget! Our production department will fabricate your required mounting (base, cart, bracket, etc.), align and assemble your system, and ensure its shipment meets your required date!

FILLING MACHINE

Used to fill containers as small as 2 oz. or as large as 5 gallons, the heart of this machine is a Jabsco flexible impeller pump. By encoding the pump shaft, and indexing each cycle down to fractions of a revolution, products ranging from solvents to sauces are efficiently and accurately dispensed.

The compact size, accuracy, ease of maintenance, and broad product capability all make the FIP the ideal pump.

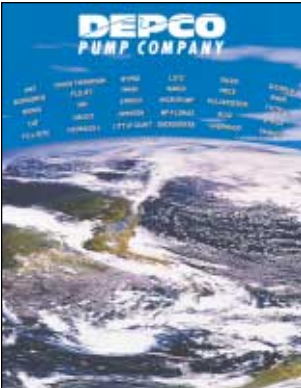

GLAZE APPLICATIONS

Here's a machine that sprays solutions such as oils, seasonings, flavorings, batters, glazes, preservatives, moisture barriers, release agents, and other similar solutions on products such as breads, rolls, pizza crusts, pita bread, cheese blocks, fish fillets, poultry, frozen breaded products, bagels, shrimp, crackers, and snacks.

ONE model of Jabsco's stainless steel sanitary flexible impeller pump is able to meter **ALL** of these solutions to the spin sprayers.

Industrial/Ag Catalog

SANITARY IS ONLY PART OF WHAT WE DO!

Depco is the complete source for all your pumping needs. Call, write, or fax us to receive your free copy of our Industrial/Ag and/or our Marine catalog. Our Industrial/Ag catalog displays pumps from over 50 pump manufacturers which together utilize 20 different pumping principles. Our Marine catalog contains information covering every pump application on a boat, yacht, ship, or marina. Both catalogs are also viewable on-line at www.depco-pump.com.

If you need to move any fluid - CALL DEPCO!
