

JABSCO HY-LINE LOBE PUMPS

Flows to 478 gpm, pressures to 215 psi

JabSCO's latest rotary positive displacement pump incorporates the very latest in hygienic design concepts in order to fulfill the ever increasing customer demands for improved cleanability, hygiene and sterilizability. This 316 stainless steel design uses a bi-wing rotor, which encompasses the very best features of tri-lobe rotor pumps and circumferential piston pumps. The pump is built upon JabSCO's 50 year experience of producing and supplying their Pureflo flexible impeller and 24 series rotary lobe pumps to the world's most demanding markets.

- Up to 478 GPM
- Up 215 PSI
- 316SS construction
- 1 to 1 million cp viscosity
- Pumps are approved by 3A and USDA-AMS and utilize FDA compliant materials
- Bi-wing "Scimitar" or tri-lobe rotors
- Nitrile, Viton, EPDM, and PTFE elastomers
- Multiple seal options
- Hydraulic drive available
- EHEDG versions available
