

CAST IRON GEAR PUMPS

ROPER

3600 Series

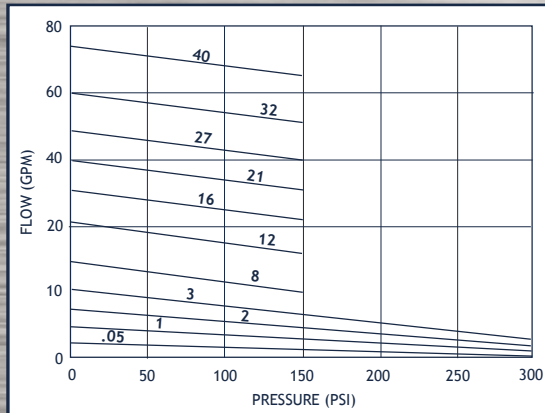

UP TO 468 GPM, 125 PSI

- Heavy duty cast iron construction
- Hardened iron gears standard
- Relief valve option
- Packing or mechanical seal
- Bare shaft or gear box drive
- Wide variety of internal material options
- Integral gear box available

ROPER

A Series

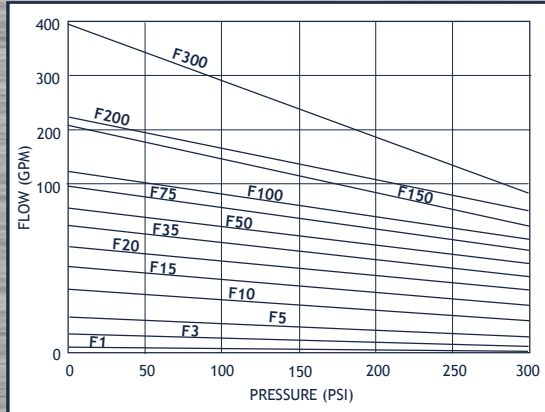

UP TO 76 GPM, 300 PSI

- Cast iron case, ductile iron option
- Hardened iron gears and steel shafts
- Bronze, iron or carbon bearings
- Bi-rotational
- Operates at synchronous electric motor speeds
- Packing or mechanical seal

ROPER

F Series

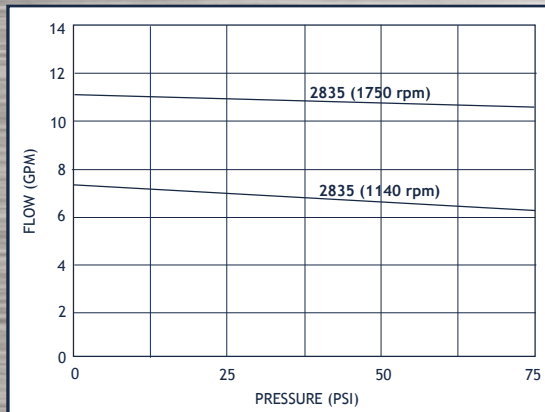

UP TO 405 GPM, 300 PSI

- High Pressure external gears
- Cast iron housing, steel gears
- Bronze or iron flange style bearings
- Outboard bearing standard
- Close tolerances, very efficient
- Helical gear design

ROPER

2835 Series

UP TO 11.3 GPM, 75 PSI

- Pumps viscous liquids at synchronous electric motor speeds
- Cast iron housing
- Hardened steel gears
- Iron bearings
- Packing, lip seal or mechanical seal
- Enlarged ports
