The FLEXIBLE IMPELLER PUMP is the most under-utilized yet most economical positive displacement pump. With its simple and cost effective design, there are numerous applications where FIP is THE pump for the job!! These self-priming, pulsation free pumps can handle thin to viscous liquids that are air entrained, contain soft solids or require gentle non-shear pumping action. Our shelves are stocked to the roof with all shapes, sizes, materials, and value added components to supply your customers with the perfect FLEXIBLE IMPELLER PUMP unit for their pumping requirements.

Flexible Impeller Pump

Applications Include:

- Soap/Dye/Liquor Transfer
- Chemical Processing
