When nothing else will fit the application, take a look at **PROGRESSING CAVITY and PERISTALTIC PUMPS**. This versatile design will handle incredibly difficult-to-pump viscous and particle-laden fluids. Configured specifically, these pumps make excellent metering pumps for all sorts of mild to volatile chemicals. Depco stocks **PROGRESSING CAVITY and PERISTALTIC PUMPS** in multiple materials of construction so we can customize as necessary to insure that your customer's toughest fluid handling applications are done right. And right on time!

Progressing Cavity And Peristaltic Applications Include:

- Sludge processing
- Paints and coatings
- Petroleum product transfer
- Oil/water separation
- Polymer injection
- Sampling
- Food products
- OEM

Industries Served:

- Municipal
- Industrial
- Automotive
- Food Processing
- Oilfield
- Agriculture
- Petrochemical
