Variable Speed	43

VANE and ROLLER PUMPS are positive displacement pumps that very efficiently handle thin liquids at low to medium-high pressures. In quite a few applications, they are the most economical solution. **VANE PUMPS** are used primarily for water, mild chemicals and fuels. **ROLLER PUMPS** are used mainly for mild to medium corrosive chemicals and powders in suspension. Depco has been a long time distributor of **VANE and ROLLER PUMPS**. We have both a strong knowledge of the product and an outstanding inventory for rapid shipping of complete units and service parts.

Vane and Roller Applications Include:

- Water Purification
- Beverage Dispensing
- AG Chemical Transfer/Spray
- Re-Fueling
- Welder Cooling
- Hot Oil Transfer

Industries Served:

- Food Service
- Commercial
- Agricultural
- Construction
- Fabrication
- Aviation Ground Support
