Sanitary / Hygienic	146-151

DRUM, TRANSFER and METERING PUMPS can be found in many industries and are used for a wide variety of fluid handling applications. **DRUM and TRANSFER PUMPS** move liquids from bulk storage containers to their point of use. **METERING PUMPS** dispense and dose liquids precisely and accurately into a process, pipeline or treatment area. Both pump categories utilize a variety of pumping principles and materials of construction to best match the fluid(s) being pumped. Depco Pump has tremendous expertise and a wealth of knowledge for these types of applications. Couple that with our phenomenal inventory, and you have a winning combination for your pumping requirements!

Drum, Transfer and Metering Applications Include:

- Drum and Tote Dispensing
- Fuel Transfer and Metering
- PH Correction
- Antiscalants for HVAC and Boilers
- Bulk Food Batching
- Chlorine Metering
- Chemical Blending

Industries Served:

- Industrial
- Residential
- Commercial
- Car Wash
- Power Generation
- Institutional Laundry
- Oilfield
- Marine
- Airports
