

FLUX DRUM PUMP MOTORS

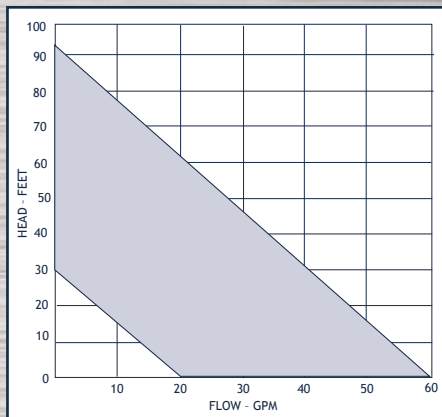

Flux offers electric and air motors to enhance the performance of their tubes. Most impeller tube set combination choices can be selected in the 50mm upgrade. Electric motors come in 120 vac or 230 vac 1 ph 60 hz in ODP, TEFC and XP enclosures. The air motors are available for either normal or hand held operation.

Model	Power	RPM	Max Viscosity
F460-1, F458-1	120 or 230 vac	9500	900 centipoises
F410EX, F458	120 or 230 vac	9000/9500	450/800 centipoises
F417, F417EL	120 or 230 vac	8500	600 centipoises
F416, F416-1	17cfm/85 psi	10,000	1200 centipoises

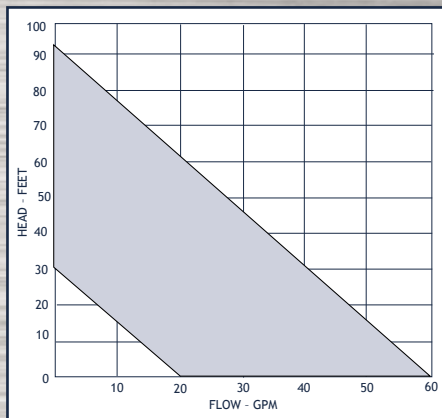

FLUX SEALLESS DRUM PUMP

- High flow, high head design
- Available in polypropylene, PVDF, or 316SS construction
- Hastelloy C impeller shafts
- High head or high volume impeller options
- Very easy to disassemble and service
- 120 or 230 vac 1 phase motors available in ODP, TEFC, or explosion proof.
- Air motors also available.

FLUX SEALED DRUM PUMPS

- High flow, high head design
- Available in polypropylene, PVDF, or 316SS construction
- Hastelloy C impeller shafts
- High head or high volume impeller options
- Very easy to disassemble and service
- 120 or 230 vac 1 phase motors available in ODP, TEFC, or explosion proof.
- Air motors also available.

FLUX 50MM HEAVY DUTY PUMP

- Available in polypropylene, PVDF, or 316SS
- Hastelloy shafts and Tefzel impellers standard
- 50mm diameter design makes for the most rugged drum pump available
- High head or high volume impeller options
- Very easy to disassemble and service
- 120 or 230 vac 1 phase motors available in ODP, TEFC or explosion proof
- Also available with air motors
