

Depco has a full range of sanitary pumps suitable for any product to be consumed. From suntan lotion to interferon, from apple juice to whole strawberry pie filling, be it thin, viscous, shear sensitive, particle-laden, or abrasive, we have what it takes to do your job!

**MILK TANKER**

Milk tankers utilize a suction pump like this Jabsco flexible impeller pump to fill at dairy farms. We keep these pumps and service parts in stock! (See page 106)

**FLEXIBLE IMPELLER CART**

This FIP pump has been mounted with a wash down duty motor on a stainless steel cart, pre-wired to a magnetic starter with 25 feet of cable. We will build it just the way you want it!

**HYDRAULIC LOBE PUMP**

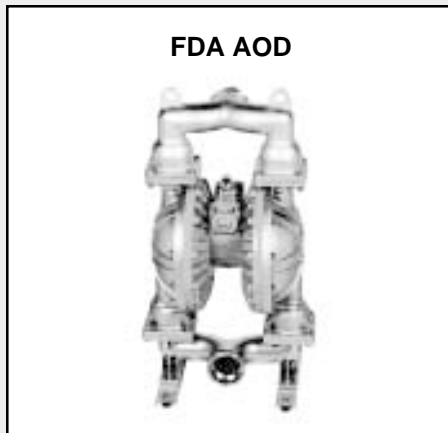

This hydraulically driven lobe pump is utilized on tanker trucks to transport liquids ranging from milk to orange juice concentrate. (See page 106)

**PHARMACEUTICAL BASEMOUNT**

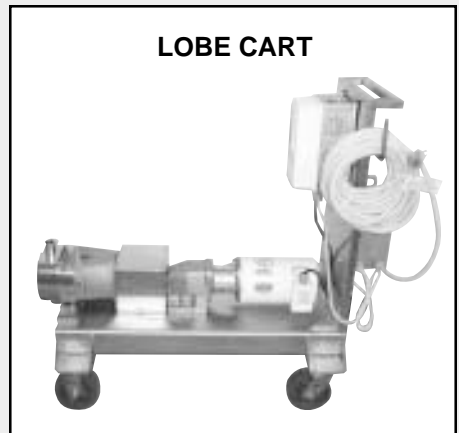

How do you like your base plates? From shot blasted to #7 polished base with legs, HAVE IT YOUR WAY! This one was used in the production of testosterone transdermal patches.

**FDA AOD**

This air operated diaphragm pump will move wine to tomato paste without modification. It automatically adjusts its speed to match viscosity! (See page 103)

**LOBE CART**

Applications aren't always straight forward. In this case we started with a 20-amp 115 vac circuit and a desire to do CIP. Here's the result. Tell us where you want to end up and we'll get you there!
