

VERTICAL CENTRIFUGAL

CONTENTS UP TO 240 GPM, 220' TDH

- Temperatures to 300°F
- Column length: 12 to 48 inches
- Construction: 316SS
- Viton®, EPDM or carbon lower bushings
- Threaded suction for using suction pipe extension
- Drive Options: single and three phase, ODP, TEFC, explosion proof and custom configurations

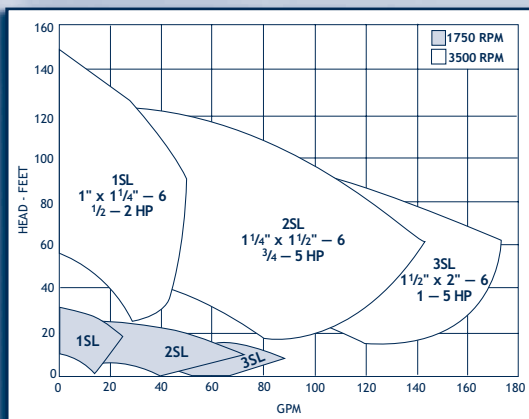

FINISH THOMPSON

Stainless Vertical Series

UP TO 170 GPM, 150' TDH

- Vertical column mount
- Enclosed impeller design
- 300 Series stainless steel construction
- 14" and 24" pump setting lengths available
- Single and three phase motors in ODP, TEFC or XP enclosures

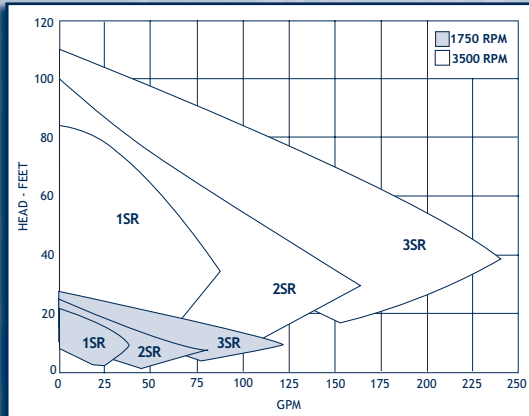

GOULDS G & L

300SS NPV SL Series

UP TO 240 GPM, 110' TDH

- Vertical column mount
- Open impeller design
- 300 series stainless steel construction
- 14" and 24" pump setting lengths available
- Single and three phase motors in ODP, TEFC or XP enclosures

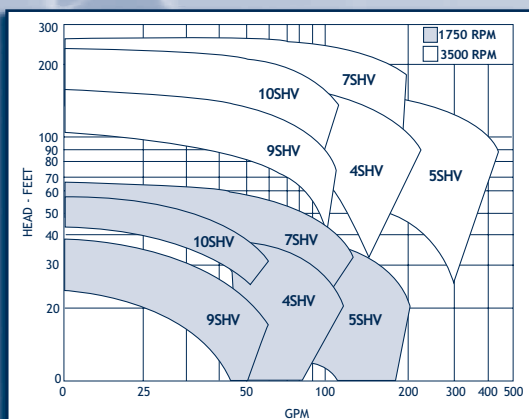

GOULDS G & L

300SS NPV SR Series

UP TO 430 GPM, 250' TDH

- Vertical column mount
- Enclosed impeller design
- 300 series stainless steel construction
- 14" and 24" pump setting lengths available
- Several motor options
- Higher flow rates and pressures than most column pumps

GOULDS G & L

300SS SHV Series
