

3A AND FDA SANITARY DRUM PUMPS

UP TO 50 GPM, 50' TDH, 1200 CPS

- Centrifugal design - F427S3A Series
- 3A Sanitary construction
- 316 stainless steel construction with Tefzel impeller
- Lengths: 27", 39" and 47"
- Electric or pneumatic drive
- Applications: wines, liquid smoke, flavorings, perfume, sauces, etc.

UP TO 6.75 GPM, 280' TDH, 50,000 CPS

- Progressing cavity design - F560GS3A
- 3A Sanitary construction
- 316 stainless steel construction with Teflon® or food grade Buna N stator and 316SS/Silicon Carbide seal
- Lengths: 27", 39", 47" and 60"
- Good with shear sensitive products and soft suspended solids of up to 3/8"
- Applications: tomato paste, honey, corn syrup, molasses, juice concentrates, mascara, gels, etc.

UP TO 10 GPM, 280' TDH, 100,000 CPS

- Progressing cavity design - F560S3A Series
- 3A Sanitary construction
- 316 stainless steel construction with Teflon® or food grade Buna N stator and 316SS/silicon carbide seal
- Lengths: 27", 39", 47" and 60"
- Good with shear sensitive products and soft suspended solids of up to 3/8"
- Applications: tomato paste, honey, corn syrup, molasses, juice concentrates, mascara, gels, etc.

FDA COMPLIANT HAND OPERATED DIAPHRAGM PUMP

The Guzzler sanitary diaphragm pump is constructed of Delrin plastic with Santoprene elastomers making it suitable for many applications in food handling, beverage, biomedical, and pharmaceutical industries. Typical installations are drum dispensing, batch sampling, and laboratory transfer. It is equipped with 1" hose connections, will move up to 10 gpm, and is self-priming to 12 feet vertically.

Model Number	Max GPM	Max Suction Lift	Port Size
BW 2400	10	12 feet	1" Hose
