DEPCO STOCKS UP TO 4" STRAINERS!

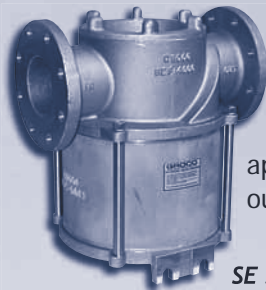

Groco ARG Series

Depco is more than just pumps! We have been steadily increasing our inventory over the years of strainers and their respective service parts to include models from 1/2" threaded to 4" flanged or threaded ports. Groco's ARG and SA series (available in 1/2" to 3" threaded ports strainers) along with Perko's 493 series (available in port sizes from 1/2" to 2 1/2" threaded ports) are heavy duty bronze raw water strainers used throughout the marine industry to protect engine cooling and air conditioning/refrigeration pumps. Groco's SE series are specifically designed for high power marine engines with 4" or larger raw water intakes which require high flow rates and low restriction. The SE series is available in 4" threaded or 4" to 6" flanged ports. A metal enclosure is also available on all three SE sizes to meet ABS requirements.

Perko 493 Series

SE Series
(4" ASEF with ABS enclosure)

Depco also stocks a wide variety of economical plastic strainers for raw water, fresh water or bilge suction applications. See our pages 65-68 for our complete selection.

DEPCO IS YOUR BLOWER SOURCE

Depco offers a complete range of marine blowers starting with Rule's extremely economical and compact inline series. They're 12 vdc and deliver up to and 235 CFM. Jabsco's plastic blowers range from economical inline to flex and flange mount side discharge models with flows to 250 CFM in 12 vdc, 24 vdc, 32 vdc and 115vac voltages. Gianneschi's heavy duty metal framed blowers deliver from 100 to 60,000 CFM and are available in multiple voltages. See page 62.

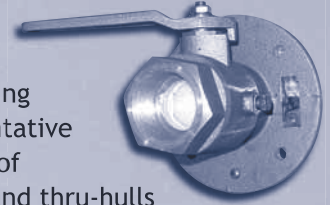

32 VDC AND 115 VAC BLOWERS

32 vdc was used extensively on commercial vessels and larger yachts for many years. Today, 24 vdc has become the standard, making it difficult to obtain 32 vdc equipment. Depco maintains a good inventory of 32 vdc blowers (see page 62) along with other 32 vdc pumps and motors. 115 vac blowers are also available to run on shore or generator AC power saving your valuable batteries.

YES, WE STOCK THRU-HULLS AND SEACOCKS!

Yes, Depco is now stocking a representative inventory of seacocks and thru-hulls manufactured by Rule, Groco and Perko. Pumps will always be our specialty. But when we were asked to

carry these items we delivered! Details can be found on page 63.

360° "SOS" DISTRESS SIGNAL PROGRAMMED INTO THESE NEW SEARCHLIGHTS!

Jabsco's new series of electronically controlled searchlights includes an automatic 20° sweep feature with two speed movement – fast for searching, slow for pinpoint targeting, plus an emergency feature that will automatically transmit the "SOS" distress signal through 360°. These searchlights are available in chrome or Jabsco's new sleek sweeping curve design with white finish. See page 61 for additional information.
