

Fluid-o-Tech rotary vane pumps 4000 series

The 4000 series rotary vane pumps, available in 7 different displacements, are the latest edition of Rotoflow high technology volumetric pumps. The pump housing, the rotor and every metallic component are in AISI 303 stainless. AISI 316 is also available.

The pumping chamber and the vanes are in high impact carbon graphite. The self-lubricating property of polished stainless steel and carbon graphite makes this pump well suited for water and water based solutions.

Inlet/outlet ports are 1" NPT female threaded (1" GAS available upon request). All models are available with NBR or Viton seals.

Main applications

- Reverse osmosis systems
- Cooling systems
- Car wash

Max. size of solid particles: 20 μ

Max. motor speed: 1725 rpm

Max. temperature: 90°C (194 F)

Max. system pressure: 25 BAR (360 PSI)

(Safety valve recommended)

Pos.	Description	Material	Code
1	Pump	STAINLESS STEEL	-
2	Screw M10 x 35	STEEL	6300190
	Washer		6300230
	Nut M10		6300270
3	Coupling M90	CAST IRON	3300080
	Coupling Nema 56C		3300100
	Coupling Nema 143TC-145TC		3300090
4	Screw M8 x 25 for M90 B14	STEEL	6300160
	Washer for M90 B14		6300220
	Screw 3/8"x1" for Nema 56C-143TC-145TC		6300200
	Washer for Nema 56C-143TC-145TC		6300230
5	Adapter M90 B14	ALUMINIUM	6300180
	Adapter M90 B14 with screws		3300040
	Adapter Nema 56C-143TC-145TC		6300250
	Adapter Nema 56C-143TC-145TC with screws		3300060
