These AMT commercial/industrial centrifugal pumps are non-self-priming (gravity feed) units designed to handle high-pressure low flow liquid transfer applications where no suction lift is required. Typical installations include: hot and chilled water, boiler feed, condensate return, irrigation, high pressure washdown, booster service, and fire protection/sprinkler systems—often referred to as a Jockey Pump. These pumps have NOT been investigated for use in potable (drinking) water systems.

Maximum Working Pressure 232 PSI [1600 kPa]

Maximum Temp 180° F

▲ When Ordering Add the Correct Suffix (-?P) to Model Number Indicating Phase (ex. MSV1-2-1P)

SINGLE PHASE (-1P) VOLTAGES	60HZ= 1/2 HP - 2 HP 115/208-230 VAC and 3 HP 208-230 VAC 50HZ= 110/220 VAC except 3 HP 220 VAC ONLY
THREE PHASE (-3P) VOLTAGES	60HZ= 1/2 HP - 3 HP 208-230/460 VAC 50HZ= 190/380 VAC

NOTE: Electric supply for ALL motors must be within ± 10% of nameplate voltage rating (e.g. 230V ± 10% = 207 to 253.)
