

## In-Line Centrifugal Pumps

1/3 to 2 hp. - six models

Capacities to 80 GPM (5 LPS) - Heads to 110 feet. (33.5M)

Install in any position - Horizontal, vertical or on an angle.

Leak Proof Mechanical Seal - Self Adjusting - for temperatures up to 225°F.(107°C)- easy to service.

Enclosed Bronze Impeller threaded onto stainless steel motor shaft.

Balanced for smoother, quieter operation.

Replaceable casing wear ring.

Easy to service - back pull-out design allows removal of pumping assembly without disturbing piping.

Saves costly fittings.

Saves Installation time.

BURKS GB Series IN-LINE pumps are efficient, close-coupled centrifugals designed for long life service on heating and air conditioning systems, pressure boosting, liquid transfer and general industrial service. They are available in Bronze Fitted, All Iron or All Bronze construction. Standard pumps are supplied with open drip-proof motors. Three phase, totally enclosed or explosion proof motors are available to meet a variety of applications.

MAXIMUM OPERATING CONDITIONS	
TEMPERATURE (For Standard Buna-N Seal)	225°F (107°C)
INLET PRESSURE	100 PSI (690 kpa)
CASE WORKING PRESSURE	200 PSI (1379 kpa)

### MOTORS

Standard pump motors have open drip proof construction and are rated with jet pump service factors for continuous duty operation. Open Drip Proof motors are 56 frame size with NEMA standard mounting flange, one piece threaded stainless steel shaft and ball/ball bearing construction.

### MOTOR INFORMATION

60 Hz - 3500 RPM - ODP

50 Hz - 2900 RPM - ODP

Single Phase: 115/230 V.

Three Phase: 208-230/460 V

Voltages may differ from some suppliers. Consult factory.

### OVERLOAD PROTECTION

All single phase ODP and Totally Enclosed motors have built-in overload protection. All three phase motors and all explosion proof motors must be installed with a magnetic starter which provides full 3-leg protection. Failure to use correct starter and overloads will void motor warranty.
