- Quick Clamp Plumbing & Hose Assemblies

Edson's Manual Diaphragm Pump Out Cart is a convenient, easy to use waste collection system that is shipped complete. Designed for small collection jobs, the cart with manual 18 gallon per minute pump and 40 gallon tank makes short work of emptying boat holding tanks. It is especially safe for self service facilities and a very economical tool for emptying tanks of boats being pulled for service or storage.

The pump out cart uses the Edson unique plumbing and hose assemblies that allows for the tank to be safely emptied by the pump while virtually eliminating the chance of accidental spillage. The pump and hose assemblies are available as separate items for those who want to use them with their own tanks and carts, trailers or boats.
