 (Air Cooled Motor)

MODEL ABBREVIATIONS:

C = Polypropylene, K = Kynar
 S = Stainless Steel, MD = Magnetic Drive

DESCRIPTION:

Series 5.5 are centrifugal magnetic drive pumps, eliminating the need for a shaft seal. These pumps can be serviced with a screwdriver. Screws should be tightened in sequence and uniformly. Do not over tighten the screws or you may crush the plastic housing bosses. See the repair parts list for a breakdown of replacement parts.

OPERATION:

These pumps are not self-priming, lack a suction lift, and thus require a **flooded suction**. These pumps **cannot be run dry** because the impeller requires the liquid being pumped for lubrication. The direction of motor rotation should be clockwise when facing the inlet of the pump. For liquids with a specific gravity greater than water, have a higher viscosity, or for elevated temperatures, a trimmed impeller may be necessary. For application assistance, contact March Pump.

ELECTRICAL:

TE-5.5-MD-AC pumps are 115/230V, 1 phase, air cooled. TE-5.5-MD pumps are 115/230V, 1 phase or 230/460V, 3 phase, TEFC. The motors are U.L. listed and rated for continuous duty. Explosion proof and special voltage motors are available upon special order.

NOTES:

All specifications & data are based on pumping water & are intended as a guideline only. Specifications may vary with different motors.

SPECIFICATIONS			TE				
			5.5C-MD-AC	5.5K-MD-AC	5.5C-MD	5.5K-MD	5.5S-MD
