RARITAN

Marine Products for Power & Sail

ICER-ETTE™

A dependable, environmentally friendly, fully automatic ice making machine designed specifically for marine applications.

Benefits

- Quick, simple installation
- Wrap around evaporator coil ensures an evenly cooled interior
- Produces up to 22 pounds of crescent-shaped ice a day
- Removable ice bucket stores 11 pounds of ice
- Ice production stops automatically when ice bucket is full
- Great addition to a wet bar
- No drain required
- Magnetically sealed door has sturdy stainless steel hinges and locking link
- CFC-free refrigerant with ozone depletion rating of zero
- Noncorrosive materials, fittings and fasteners
- Door can be hinged for right-hand or left-hand opening
- Each unit is assembled by hand, individually tested and backed by Raritan's one-year Limited Warranty and legendary technical support team

Options

- Two sizes and several door color combinations that complement any boat interior
- Available for 120V AC, 60 HZ and 240V AC, 50 HZ

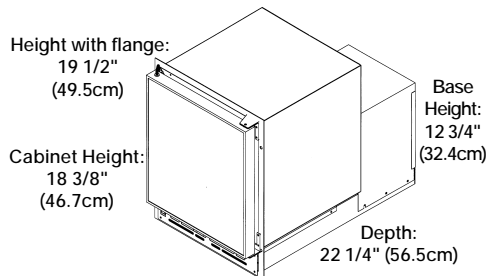

Raritan manufactures equipment for pleasure boats throughout the world. Products include marine toilets, waste treatment systems, icemakers and water heaters.

Committed to the environment and preserving sea life, Raritan designs products to help maintain an environmental balance and ensure the quality of marine waters. In addition, the company has achieved ISO 9001:2000 certification for quality.

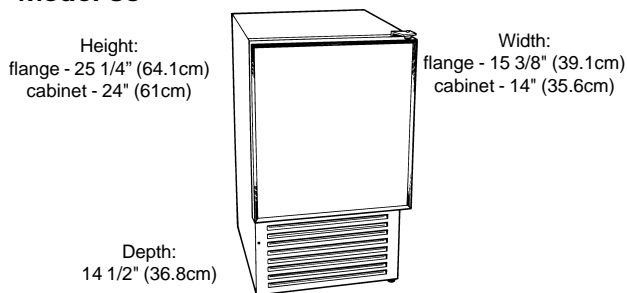

Innovation Through Experience

ICER-ETTE

Model 84

Model 85

Installation Features

Icer-ettes are easy to install. The only plumbing required is a 1/4 inch (.6 cm) water supply line. No drain is needed. Each 120V AC unit has a three-wire cord with a grounded plug. 240V AC units come with a Euro plug.

Approximate Shipping Weight: 66 - 75 lbs (30 - 34 kg)

Appliances intended for use on land are not always adaptable for use on the water. The Icer-ette is designed specifically for boats. It is constructed of the finest marine grade components and hardware. A durable, magnetically sealed door has sturdy stainless steel hinges and a door locking link for added stability in rough seas. The Icer-ette's special wrap around evaporator coil ensures an evenly cooled interior.

Ice production automatically halts when the sturdy, removable ice bucket is full.

The CFC-free refrigerant offers an ozone depletion rating of zero, making the CFC-free Icer-ette environmentally responsible as well as dependable.

The 85 model fits in normal spaces under a counter. It comes either free-standing or with a built-in flange (the flange attaches to an existing cabinet). The 84 model fits in the shorter but deeper spaces such as those found on an aft deck or helm seat. All 84 models come with a built-in flange.

Icer-ette cabinets can be either stainless steel or vinyl clad. Stainless steel units are recommended for exterior installation.

Door panels are brushed stainless steel, designer white (Wilson Art D354-6), neutral white (Formica 918), antique white (Formica 932) or black laminate. Door panels are removable and can be changed to coordinate with any decor. Doors can be hinged to open either left or right.
