SCOT Sea Strainer - Bronze
1 1/2 inch and 2 inch

Removable Cover

To Pump Suction

From Seacock

1-1/2 inch female NPT or 2 inch female NPT

Strainer Body Flange

Scot Pump Florida – Ardox Corp Fort Lauderdale, FL www.scotpumpmarine.com SN-890-915 Repl. April 17, 2014

Install with other pumps using an optional flange fitting.
The 890-915 strainer has the inlet at the top and the outlet at the bottom. This design assures the pump will have a source of water if the strainer is only half full of water. Prevents pump air locks.

Includes:
- Bronze Body
- Nylon Filter Basket – 1/4 inch Mesh
- Heavy Clear Acrylic Cover and O-ring

The 890-915 strainer is easily cleaned. The sea strainer has a big wide opening to facilitate easy removal of the basket.

Mount strainer base with four 1/4 inch screws.
A flexible connector should be used in the suction line between the strainer and the seacock. Outlet flange matches to strainer flange.

Strainer Body
