When you need to transfer gasoline, diesel, or kerosene in frigid temperatures as low as -40° F / -40° C, you need a pump system that delivers each and every time you use it. That system is one of our Arctic Duty Series Pumps with Arctic Duty accessories.

We've taken four of our top-selling pumps and made them "Arctic Ready" by matching them with our line of Arctic Duty accessories. You get the complete system, the pump of your preference and our Arctic Duty Nozzles, Hoses, and Swivels, all in one box.
